So WHY should anybody be surprised....?

Filled-in Shadows

'Unearthly' shadows in Apollo photographs include filled-in light where some people think there shouldn't be any light.

"IN VACUUM, SHADOW IS PITCH BLACK!"

"NASA PHOTOS SHOW CLEAR EVIDENCE OF BACKLIGHTING FROM LAMPS OR MIRRORS!"

Shadow Experiment #1

Try this at home (or at school): photograph a model with bright backlighting, and see how reflectivity of the foreground affects amount of 'fill-in' backscatter. 22

LM Liftoff -- Flames?

"ROCKETS MUST SHOW FLAMES IN SPACE!!"

Everybody thought the rocket plume would be visible. And who took the picture?

"Moon heat would burn up everything, or freeze in shadows!"

Moon Temperature

Astronomers measured surface temperatures a century ago -- but 'gee-whiz' journalists loved to brag about instant heat/cold extremes

Astronomy Observations of Apollo

Saturn third stages fired in sight of Hawaiian Islands (left); translunar fuel dumps (and the explosion of Apollo-13) seen; last stage and LM's garage panels photographed (below).

Norman Mailer "Of a Fire on the Moon", 1969

• "The event was so removed, however, so unreal, that no objective correlative existed to prove it had not been an event staged in a television studio -- the greatest con of the century --- and indeed a good mind, product of the iniquities, treacheries, gold, passions, invention, deception, and rich worldly stink of the Renaissance could hardly deny that the event if bogus was as great a creation in mass hoodwinking, deception, and legerdemain as the true ascent was in discipline and technology. Indeed, conceive of the genius of such a conspiracy. It would take criminals and confidence men mightier, more trustworthy and more resourceful than anything in this century or the ones before. Merely to conceive of such men was the surest way to know the event was not staged."
